DESIREE N. WADE

WEB CONTENT STRATEGIST | FRONT END DEVELOPER | ENTERPRISE CMS

desireewade5@gmail.com | (301) 332-3441 | dubstitch.github.io

PROFESSIONAL PROFILE

Web content strategist and front end developer who translates complex business needs into useful digital experiences. Combines enterprise CMS operations, information architecture, responsive UI engineering, content governance, accessibility-minded implementation and practical analytics. Experienced partnering across marketing, content, design and technology teams to publish and improve high-visibility websites.

PROFESSIONAL EXPERIENCE

WEB CONTENT STRATEGIST

American Society of Civil Engineers (ASCE) | March 2026 to Present

- Plan, develop and publish enterprise web experiences across Sitecore and Higher Logic, connecting content strategy, layout decisions, custom implementation and quality assurance.
- Help shape the ASCE 2027 digital experience through navigation and information architecture, the student member journey, schedule presentation, event and technical tour content, sponsor opportunities and responsive components.
- Built and refined 175th Anniversary Toolkit experiences, including celebration resources, the grants application, interactive content, breadcrumbs and public access fixes.
- Create and troubleshoot custom HTML, CSS and JavaScript solutions when standard CMS components cannot support the required interaction, presentation or content structure.
- Supported a Collaborate platform migration by producing ten section contact pages and reusable leadership, sponsor grid and slider patterns within compressed delivery timelines.
- Improved membership discovery experiences through targeted page architecture and components for prospective student and professional members.
- Review navigation, semantic hierarchy, keyboard focus, responsive behavior, component performance and live publishing details to improve usability and accessibility.
- Use GA4 and Looker Studio reporting to evaluate engagement, content discovery and user behavior, translating findings into stakeholder recommendations and documenting reusable approaches.

WEBSITE AND DIGITAL CONTENT SPECIALIST

Holton-Arms School | From October 2024

- Managed content, publishing and usability within the Finalsite school website, maintaining accuracy and consistency across institutional and academic pages.
- Designed and developed branded custom pages for school initiatives and changing communication needs.
- Partnered with academic, advancement and marketing teams to support curriculum content, fundraising, donor engagement and alumni relations.
- Reviewed website analytics, navigation and page structure to identify opportunities to improve content discoverability and user experience.

SOFTWARE ENGINEER, FULL STACK (CMS)

American Public Education Inc. | June 2022 to August 2023

- Implemented the cloud-based Sitefinity CMS as part of a migration from SiteExecutive, supporting content transitions and publishing workflows.
- Served as Sitefinity trainer for content authors and teams, supporting platform adoption and sustainable publishing practices.

- Worked with IT, Marketing and business stakeholders to scope and implement enhancements informed by scalability, performance and operational needs.
- Collaborated with engineering leadership to diagnose application issues and translate UX and business requirements into maintained solutions.

FRONT END WEB DEVELOPER

American Public Education Inc. | December 2018 to June 2022

- Created and maintained dynamic SiteExecutive web pages and enhancements supporting university audiences and business departments.
- Collaborated with UX designers on student- and faculty-facing features, translating interface designs into maintainable solutions.
- Supported reusable content tools and shared services, including Drupal theme and site builder work for Girl Scouts of the USA.

FRONT END WEB DEVELOPER (CONTRACT)

TEKsystems / American Public University System | June 2018 to December 2018

- Delivered front end implementation and web experience enhancements for APUS as a contracted developer.
- Developed a custom Banner Creator for Marketing, turning a recurring production request into a reusable internal tool.

SOFTWARE DEVELOPER

KRM Associates Inc. | March 2016 to June 2018

- Contributed to Department of Veterans Affairs enterprise Health Management Platform (VA eHMP) web applications and clinical interfaces.
- Worked on the VA eHMP Image Viewer and health record information integration using FHIR interoperability concepts.
- Implemented JavaScript and Node.js / Express REST services, and prototyped clinician-facing applets and interface flows.
- Supported messaging functionality and the Light Enterprise Application Framework (LEAF) front end foundation.
